

Addendum Quotation: Phase 1 Additional Features for Poornasree AI

Client: Poornasree Equipments

Provider: Pydart Intelli Corp Pvt Ltd

This quotation covers the new scope and architectural changes requested for Phase 1 of the customized AI Web Application. These features will be built in addition to the core AI Chatbot infrastructure previously agreed upon.

Project Scope: New Phase 1 Features

1. WhatsApp-Exclusive Customer Interface

- **WhatsApp Support Integration:** Transition to a pure WhatsApp interaction model for customers, completely eliminating the need for a website login.
- **Customer Registration Workflow:** Automated registration requiring the customer's Phone Number and Machine Serial Number.
- **Serial Validation:** The system will fetch and validate machine details using the last 5 digits of the provided Serial Number.
- **Video Registration:** A new feature allowing customers to record and upload videos of machine faults directly via WhatsApp.

2. Enhanced Roles & Login System

- **Dealer Portal:** Mandatory Login ID with capabilities to register complaints on behalf of customers.
- **Service Engineer Dashboard:** Dedicated view to track Open, Closed, and Total ticket counts.
- **Service Manager Role:** A newly created role specifically for assigning incoming tickets to engineers based on Pincode.
- **Admin/R&D Console:** Upgraded access to manage internal documents and monitor overall system status.

3. Secure Ticket Closure & Metrics

- **OTP Closure:** Service Engineers will be required to input a 4-digit OTP—provided directly by the customer—in order to officially close a ticket.
- **Automated Feedback:** The system will automatically trigger a WhatsApp rating request (1-5 scale) to the customer immediately after ticket closure.

- **Performance Metrics:** System tracking for ticket 'Age' (how long a ticket remains open) and 'Duration' (the actual time taken to solve it).

4. Management & UI Enhancements

- **Pincode Routing:** Automated assignment of complaints to the appropriate Dealers or Engineers based on geographic location.
- **Advanced Export Reports:** The ability to download system data with strict filters for Complaint ID or Pincode.
- **Confidential R&D Section:** A private, secure server/folder environment strictly for R&D and Engineers to share internal repair videos.
- **Dynamic Branding:** Customizable UI allowing Admin updates to the Logo, Address, and system Icons.

Additional Pricing

- **Cost for Phase 1 Additional Implementations:** ₹70,000 + GST

(Note: This is an add-on development cost to the original base project. Storage solutions for the high-quality video uploads and any third-party WhatsApp & LLM API messaging costs will be billed separately based on your server/hosting architecture).
