

Customized AI Web Application for Poornasree Equipments

Thank you for choosing our **Basic + Customized AI Web Package** for Poornasree Equipments. We are committed to delivering a **smart, scalable, and AI-driven solution** tailored to your current needs while ensuring readiness for future enterprise-grade AI capabilities.

Project Scope & Features 1. AI-Powered Chatbot (English & Hindi)

- Retrieval-Augmented Generation (RAG) model trained on Poornasree Equipment's manuals, service guides, and troubleshooting documents.
- Contextual, accurate responses for **Analyzer** and **DPST** product lines.
- Multilingual support (English & Hindi, expandable to other languages).
- Integrated into both **website** and **admin dashboard**.
- **Audio Input:** Users can speak their queries instead of typing.
- **Audio Output:** AI can respond in natural voice for better accessibility and faster interaction.

2. Video Recommendation System

- AI-powered video suggestions for troubleshooting and training.
- Auto-mapping of relevant videos to queries.

3. Customer Portal

- Step-by-step product guidance.
- Troubleshooting assistance via chatbot + youtube video links.
- Secure login with OTP/email verification.
- Mobile-responsive interface.

4. Admin Panel

- Real-time dashboard of chats and system activity.
- Search trends and frequently asked questions analysis.
- Issue tagging and categorization.

- Upload training documents to improve AI.
 - Video mapping and management.
 - CSV export of chat logs and reports.
 - Graphical analytics on query trends and resolutions.
-

5. Backend & Database

- **Backend:** FastAPI (Python) – optimized for AI integration.
 - **Database:** MySQL or SQL Server for structured data.
 - **Vector Database:** Weaviate for semantic search and RAG model.
 - **Security:** Token-based authentication and role-based access control.
 - **Scalability:** Future-ready for mobile app integration.
-

6. AI Training Pipeline

- Content collection begins in **Week 1**.
 - Ongoing updates to training data.
 - Supports PDF, DOCX and TXT formats.
-

7. General Features

- Modern UI/UX design aligned with brand identity.
 - Cloud-ready (Azure, AWS, or preferred provider).
 - Data privacy compliance with Indian IT laws & GDPR.
 - Six months of post-launch technical support.
-

Implementation Timeline – 6 Weeks

Phase	Duration	Weeks	Description
Planning, UI/UX & AI Content Prep	1 weeks	Weeks 1– 2	Requirements, design, and AI document collection
FastAPI Backend Development	3 weeks	Weeks 1– 4	API, database, authentication, and AI integration
Flutter Web Application	2 weeks	Weeks 2– 4	Customer and admin interface development
AI Chatbot Training	1 weeks	Weeks 4– 5	Model setup, RAG configuration, audio input/output integration, and testing
Reports & Video Integration	1 weeks	Weeks 4– 5	Graphical reports, CSV export, and video mapping
Testing & Deployment	1 weeks	Weeks 5– 6	QA, training, and production deployment

Payment Structure Milestone	Description	Amount
Advance	Project confirmation and setup	20%
Design Completion	UI/UX approval	30%
Development Completion	All core functionalities ready	30%
Final Handover	Testing, documentation, and launch	20%

Total (Excl. GST) ₹ 150000 + GST

Note: Domain registration, server hosting, Azure database, vector database (Weaviate) hosting, and other related costs are not included in this proposal.
